

Hope Artificial Intelligence

Scenario Based Learning

A company works with number of employees, all the works are dependents on the employees. Even if one of the employees resign the job immediately then assigned work will be not finished at the time, so delivery of the project to the clients will be delayed. Company planned to make solution for this, they want to know which employee may resign next. If they know previously, they can arrange alternative to avoid such problem. As an AI Engineer you must give Solution to this.

A) How will you achieve this in AI?

Answer: Based on the employee recent activity and behaviour records, we can predict it in AI.

B) Find out the 3 -Stage of Problem Identification

Answer:

Stage1: Machine Learning

Stage2: Supervised Learning

Stage3: Classification

C) Name the project

Answer: Talent risk guard

D) Create the dummy Dataset.

I have added a excel sheet for dataset
